

Nortel Universal Wall Bracket

(WALL BRCKT 36000)

The Universal Wall Bracket is designed to be "snapped off" to fit your application.

Each size is identified on the front of the bracket with raised lettering.

Pencil lead was used to make markings visible for photo.

Simply snap the ends off to achieve the correct size.

Some plastic residue may be left behind. This will not necessarily interfere with future spacing, but you may trim the excess if desired.
